To Chester High School Community,

I am grateful to be given the opportunity to serve as Principal of Chester High School. I am aware that Chester High School is part of a community steeped in pride and tradition. As we move forward to begin this school year, administration seeks to collaborate with parents and engage our community members in collaborative dialogue and planning to ensure our students receive the supports needed to meet with success.

This year, we have exciting initiatives to improve and enhance student learning. The faculty, administration and staff will have more opportunity to expand our knowledge and practice with professional development and collaborative planning every Wednesday. We have begun revamping our Cyber School program for credit recovery, developing policies and expectations that will enable our students to acquire credits through a multiple pathways for graduation. The Career and Technical Education program is a vital component of our school community. This year, Career and Technical Education will have a Business Administrative program that will enable students to become certified in Microsoft software, that can be utilized for corporate as well as entrepreneur careers. Student government and Youth Court will continue to be implemented to give our students a voice as stakeholders within the Chester High School community. Our Chester High Achievement Mentoring Program will expand and we will incorporate this model of support for our young ladies as well. This year, we will have our 9th grade Academy establish its identity based on the unique attributes of a student population transitioning into secondary education. A new Assistant Principal for the 9th grade Academy will support this initiative by setting high expectations for student learning, while providing guidance and behavioral support that promotes positive development for social and emotional growth.

In addition, there will be an Assistant Principal for School Climate and Culture (Mr. Lamonte Popley), an Assistant Principal for Instruction (Mr. Ray Thompson), and an Assistant Principal leading our Ninth Grade Academy (Ms. Marchelle Foreman). Both administrators have years of experience in public education and seek to continue to build upon our foundation for Chester High School to be an institution of learning where excellence is the expectation. After 26 years in education, this is an opportunity to demonstrate an extraordinary journey I've had in leadership and to be part of a school community on the precipice of greatness.

The foundation of high expectations will continue to be built upon, and there's no going back now. We are headed in the right direction and together, we will make sure that everyone knows, "What Chester **High** Makes, Makes Chester".

Respectfully,

Principal Tanya Glenn-Butler
